EXPERIENCE

ZS ASSOCIATES | FRONTEND DEVELOPER
Jul, 2020 – Present | D3.js • Chart.js • Scss • Axios • rxjs • husky • okta • jest •enzyme

- Working on a react web application for visualizing and analyzing pharmaceutical drug product's complaint data and presenting it in form of charts using D3.js and chart.js.
- Created custom charts tweaked as per business requirements using D3.js, along with its supporting features like chart image download and chart data download in csv.
- Also wrote test cases using Jest and Enzyme

FREELANCING | FRONTEND DEVELOPER
Jan, 2020 – Jul, 2020 | Final Form • React-i18next • Redux API middleware • Redux • React-Spring • React Router v4 • Git submodules

- Worked as a freelance frontend developer for small startups
- Architected and built an ecommerce web app with multi-language support and RTL support, used Reactive core architecture to share business logic and data handling logic between React web app and React-native app.

NYKAA | FRONTEND DEVELOPER
Jan, 2019 – Sep, 2019 | Firebase • A/B Testing • Css Modules • Redux • Axios • Jest

- Was actively involved in building new features and maintaining old features like Nykaa pro.
- Introduced an AR makeup try-on using Modi-face lib for the iOS WebView with firebase stage releases.
- Built the new mobile signin/signup flow with React's Context API and State Machine Pattern.
- Wrote test cases with Jest.

TAILORED TECH SOLUTIONS | MOBILE DEVELOPER / FULLSTACK DEVELOPER
May, 2016 – Jan, 2019 | Android • React-Native • Laravel • React

- Worked with a small team sometimes solely to deliver products on a strict timeline, Responsibility ranged from Architecting, maintaining code quality, product deployments and client communication.
- Worked on a react project named Bijli/Snapteam in which I have architected the home page components to communicate with other homepage tabs and handle real-time data updates, also created this project's compose flow which is used to draft post message, tag people, attach documents and create to-dos. used technologies like pusher.js, Aphrodite, react-redux-form, material-UI. Link
- Have created 2 and published 1 React-Native app for iOS and Android so I am familiar with its lifecycle, while working with React-Native CLI, some technologies used in these are React native navigation (wix), Axios, React native firebase. Project Link 1 Project Link 2
- Initially Worked on Native Android projects and have complete lifecycle experience from developing to publishing/managing, also have experience on needed android libraries which includes: Retrofit, Dagger, Picasso, Active Android, etc. Link
- Built the initial website of benefactory using vanilla JavaScript, HTML and scss, used Laravel's blade templating engine to reuse components. Link

SKILLS

LANGUAGE

- JavaScript ES6
- Java
- PHP

WEB DEVELOPMENT

- React 16+
- HTML/CSS
- Laravel
- Electron

MOBILE DEVELOPMENT

- Android
- React-Native

SIDE PROJECTS

Web Portfolio | React | Link | GitHub

- Personal portfolio website made with React and using React-spring for unique animations inspired from dribbble and Behance.

VC Music Player | Android | Link

- Developed a music player while in college with additional features like voice control, floating widgets, multi theme implantation, download missing album art.
